

All your environmental monitoring data in one secure location

Sonitus Cloud enables you to access all your environmental monitoring data in one location from any internet enabled device. Check real time data, generate reports and configure your systems to manage your projects efficiently. The simple interface means anyone can run the projects with simple calendar overviews, detailed daily data and user definable alerts. Sonitus Cloud also allows you to set user and access rights for projects to ensure everyone can see exactly what they need.
