

INDOOR AIR QUALITY MONITORS

STARTER TEST KIT FOR INDOOR AIR QUALITY MONITORING

aeroqual™

The Aeroqual Starter Test Kit for indoor air quality monitoring is for users who want an affordable set of sensors to measure common indoor pollutants.

The starter test kit features Aeroqual's proven Series 500 portable monitor that can be used to measure a range of pollutants by simply swapping the sensor heads for the pollutant you wish to monitor.

The kit includes the following sensors: particulate matter sensor (PM10/PM2.5), two indoor pollutant gas sensors (CO₂, VOC) and a combined temperature and relative humidity sensor.

BENEFITS

- Easy-to-use air quality monitoring kit with everything required to get started measuring three common indoor pollutants
- Series 500 monitor with inbuilt real-time data logger
- Active fan sampling sensor heads (PM2.5/PM10, CO₂, VOC) ensure high accuracy measurements
- Zero and span calibrate sensors in the field
- Long life lithium battery technology
- Connect direct to PC via USB
- Free PC software (Windows 7 and above)

APPLICATIONS

- Indoor air quality assessments
- Personal exposure checks
- Health and safety compliance
- Checking indoor air pollution "hotspots"
